CERTIFIED BOTTLES

The safety of food contact materials must be evaluated as chemicals can migrate from the materials into food. The materials must be manufactured in compliance with EU regulations, including good manufacturing practices, so that any potential transfer to foods does not raise safety concerns, change the composition of the food in an unacceptable way or have adverse effects on the taste and/or odour of foods.

Soft touch coatings make characteristically unpleasant surfaces, such as those of many plastics and metals, more appealing to customers. These coatings can be formulated to feel rubbery & velvety to positively differentiate products from the competition.

By drinking water from a BPA-free water bottle you are eliminating a main source contributing to higher BPA levels in your body. For improved health and to decrease the risks of the health effects above, we recommend choosing BPA-free drinking bottles from Colorissimo®.

electronic devices

SAFE AND DURABLE

All Colorissimo® power banks contain the following features:

Temperature Resistance

Heat-sensitive and temperature control mechanisms ensure batteries operate within a safe range.

Input Over-Voltage Protection

The OVP circuit prevents voltage surges from damaging the device.

Output Overvoltage Protection

Monitors the output voltage and shuts off when the voltage exceeds the maximum limit to protect the device.

Short-circuit protection

The motherboard and battery are automatically protected in the event of a short circuit.

Automatic Charger Protection

Detects when the charger is inserted incorrectly and will automatically stop charging.

Overcharge and Over-discharge protection

This technology is used to prevent damage to the batteries from overcharging and over-discharging.

Electrical / electronic equipment manufacturers planning to sell their products must ensure that their equipment won't electromagnetically interfere with other products or cause harm to the public.

CE sign indicates conformity with health, safety, and environmental protection standards for products sold.

The RoHS Directive lays down rules on the restriction of the use of hazardous substances in electrical and electronic equipment with a view to contributing to the protection of human health and the environment.
